

SIEMENS

"The Power to Go Anywhere"

- 50 watts of clean, quiet solar power
- Reliable 12-volt battery charger
- Generates 12 to 15 amp-hours per day
- 25-year limited module power warranty

RV Power Kit 50

SOLAR BATTERY CHARGER

Clean. Quiet. Dependable.

Enjoy all the benefits of solar power with an easy-to-install, simple-to-use RV Power Kit from Siemens Solar. RV Power Kits give you the freedom to escape from crowded campgrounds and noisy generators with your own independent power source fueled by the sun.

How does it work?

No advanced degree is required. The science of the RV Power Kit is really simple: the more sunlight the solar panel can absorb, the more power your system can provide. The Siemens Solar panel is highly efficient and produces electricity in as little as 10% of full sunlight. Whenever **the sun shines on the panel, electricity is produced** and fed into your vehicle's 12-volt battery.

What can be powered?

The 50-watt RV Power Kit will generate approximately **12 to 15 amp-hours per day** if exposed to 4 to 5 hours of full sunlight.* That's enough power for DC appliances, such as:

- AM/FM radio
- ventilation fans
- fluorescent lights
- TV / VCR
- circulation pumps

Is this a reliable power system?

The RV Power Kit is designed and manufactured by Siemens Solar, uniformly recognized as the world's largest manufacturer of solar energy panels. Siemens Solar is an ISO 9001-certified manufacturer and stands behind its RV Power Kits with a **25-year limited power warranty on the solar module**. Count on the RV

Power Kit 50 for reliable battery charging and *The Power to Go Anywhere*.

Is this a complete power system?

The RV Power Kit provides you with **everything you need** to install your own efficient, reliable solar power system and begin generating electricity. The heart of the kit is the 50-watt, 2.95 amp high efficiency solar panel which converts sunlight into direct current (DC) electricity. A charge controller keeps your batteries fully charged, and at the same time, protects them from over-charging. The solar panel is fully tested and approved by Underwriters Laboratories (UL). The complete RV Power Kit includes all the mounting hardware, wiring and directions you need for a trouble-free and sturdy installation. Once your system is installed, you're ready to go anywhere—just add sunlight.

Need more power?

For **more power**, add on as many as four easy-to-install RV Power Kit 50 Expansion kits (available in 50-watt units).

The Siemens Solar RV Power Kit 50 is backed with a 25-year limited power warranty on the solar module. A 5-year warranty applies to all other kit equipment.

* Power generation may vary due to the position of your vehicle and the time of year.
